Stone Crest Gardens

EAU CLAIRE, WISCONSIN

OUR AIM is to grow only the desirable varieties and to furnish stock that will grow, as a satisfied customer is our wish.

The soil of our five acre plantation is ideal for the growing of roots and bulbs. We have irrigation in case it is needed and a frost proof root cellar for Gladiolus bulbs that insures plump, hard bulbs full of vitality.

All prices are cash with order unless customer has a charge account on our books.

We prefer to ship by Express. In case of small shipments by parcel post add ten cents per root for postage on Peonies and twenty cents per dozen on Iris roots. Gladiolus prepaid in small lots.

CULTURAL DIRECTIONS

PEONIES

Peonies will grow in any good garden soil but should have a sunny location. Use fertilizers cautiously, a handful of bonemeal per plant each year is sufficient. Do not plant the topmost eyes more than two inches below the surface. Good drainage is essential. If your planting plat is a flat surface mound the earth around each plant to raise the crown above the spring water that thaws and freezes. Plant during early October if possible. Spring planting is not recommended but is often done successfully—remember the eyes are very brittle in the Spring, but stand handling well when dug in the Fall. Most divisions will show bloom the first year, but do not expect nor allow more than two blossoms. It requires one year for plants to be well established after which you can expect bloom for a lifetime every year in June. Mulch peonies the first winter.

IRIS

Plant Iris in well drained garden soil covering the top of the fleshy roots not more than one inch. A sunny location is preferred for most kinds. A sprinkle of lime or hardwood ashes on the soil before preparation is recommended. Iris multiplies rapidly and should be divided every three or four years. No winter protection is required for the varieties listed. Beware of heavy fertilization. A small application of bone-meal and lime each year is all that is necessary. Mulch all late planted Iris.

GLADIOLUS

Plant Gladiolus in full sunshine in any good garden soil two inches deep. The bulbs can be planted four inches apart in double rows for cultivation. When the bulbs are planted a top dressing of pulverized sheep manure is recommended. This dressing should be renewed when the flower buds appear for best bloom, but the average garden soil without any enrichment will produce good bloom. Dig the bulbs when frost has killed the foliage. Cure in a dry warm place for a few days. Clean the bulbs of roots and old corns and store in a frost proof cellar over winter. Successive plantings can be made from April 15th to June 10th for an extension of bloom. Save the bulblets for propagation of the varieties. All come true. Plant them early when there is plenty of moisture in the soil. Sow thickly and cover lightly.

MISCELLANEOUS OFFERINGS

LILY OF VALLEY AND LEMON LILLIES

Lily of Valley pips \$1.25 per 100, \$10.00 per 1000. A good variety of reliable bloomers of the smaller and most fragrant kind.

Giant Lily of Valley: 15¢ each, \$1.50 per dozen. This has much larger bloom and a delicate fragrance.

Lemon Lily: 25¢ each, \$2.50 per dozen. A very dependable perennial that produces an abundance of yellow flowers on long stems. Fine for cutting and very fragrant.

Orange Lily: Similar in foliage to Lemon Lily but a deeper yellow without fragrance. Price 25¢ each, \$2.50 per dozen.

SHRUBBERY

Field Grown

 Selected from above list 2 Reds, 2 Whites, 2 Pinks
 On all peony orders amounting to \$15.00 or more
 per list, a discount of 10 per cent will be allowed.

Gladiolus

We handle only the desirable varieties—those of
 proved merit and sort them into three classes.

BLOOMING SIZE: Covering the usual classifica-
 tion of No. 1 and 2 over 1 inch.

SECOND SIZE: Covering No. 3 and 4 nearly all
 of which will give good bloom and make the best bulbs
 for next years planting.

PLANTING SIZE: Covering No. 5 and 6 for grow-
 ing virgin bulbs of various sizes.

Prices are given for these three sizes by the dozen.
 If wanted by the 100 the price is seven times the dozen
 price. Special quotations made on lots of 1000 or more.
 Bulblets are priced by the 1000 as one usually wants to
 plant that many for satisfactory results.

We have an excellent root cellar for winter storage,
 the bulbs are as hard and firm in April as they were
 in November and show their stored vitality when the
 shoots appear, in a dark green foliage. Proper storage is
 an important factor. All bulbs are treated with Semis-
 an before planting and are free from disease. A trial
 will convince you of the importance of proper storage.
